*This study aims to determine and analyze the effect of production, exchange rates, international coffee prices and the country's economic growth rate in Egypt partially and jointly on Indonesian coffee exports for the 2011-2021 period as well as the elasticity of Indonesian coffee exports on production, exchange rates, international coffee prices and economic growth rates. This research method uses quantitative and explanatory methods. Data collection techniques are carried out using secondary data sourced from BPS and the World Bank. Data analysis technique using Multiple Linear Regression. Based on the results of the study, it shows that partially coffee production and international coffee prices have no significant effect on Indonesia's coffee exports in 2011-2021, while the rupiah exchange rate variable and Egypt's economic growth rate have a significant influence on Indonesian coffee exports in 2011-2021, together with coffee production, exchange rates. Coffee prices and the pace of economic development in Egypt have a significant effect on Indonesia's coffee exports in 2011-2021 as shown by the results of the F test of 7.081235 with a significance of 0.0000.*

***Keywords: Coffee Production, Rupiah Exchange Rate, International Coffee Price, Economic Development Rate, Coffee Export.***

## ABSTRAK

### **PENGARUH PRODUKSI, NILAI TUKAR, HARGA KOPI INTERNASIONAL DAN LAJU PERTUMBUHAN EKONOMI NEGARA MESIR TERHADAP EKSPOR KOPI DI INDONESIA PERIODE 2011-2021**

Penelitian ini bertujuan untuk mengetahui dan menganalisis pengaruh produksi, nilai tukar, harga kopi internasional dan laju pertumbuhan ekonomi negara Mesir secara parsial dan bersama-sama terhadap ekspor kopi Indonesia periode 2011-2021 serta elastisitas ekspor kopi Indonesia terhadap produksi, nilai tukar, harga kopi internasional dan laju pertumbuhan ekonomi. Metode penelitian ini menggunakan metode kuantitatif dan *eksplanatory*. Teknik pengumpulan data dilakukan melalui data sekunder yang bersumber dari BPS dan World Bank. Teknik analisis data menggunakan Regresi Linear Berganda. Berdasarkan hasil penelitian menunjukkan bahwa secara parsial produksi kopi dan harga kopi internasional tidak berpengaruh signifikan terhadap ekspor kopi Indonesia tahun 2011-2021 sedangkan variabel nilai tukar rupiah dan laju pertumbuhan ekonomi negara Mesir memiliki pengaruh signifikan terhadap ekspor kopi Indonesia tahun 2011-2021, secara bersama-sama produksi kopi, nilai tukar, harga kopi dan laju perkembangan ekonomi negara Mesir berpengaruh signifikan terhadap ekspor kopi Indonesia tahun 2011-2021 ditunjukkan dari hasil uji F sebesar 7.081235 dengan signifikansi 0,0000.

**Kata Kunci : Produksi Kopi, Nilai Tukar Rupiah, Harga Kopi Internasional, Laju Perkembangan Ekonomi, Ekspor Kopi.**
