

ABSTRACT

ELMA RIYANI FAJRIN, 2023. Analysis of Traditional Games in Public Elementary School 1 Pamijahan. Department of Physical Education, Faculty of Teacher Training and Education, Siliwangi University, Tasikmalaya.

Traditional games are games that have been played by children originating from an area in a traditional way, that is, these games are inherited from one generation to the next. The factor causing the elimination of traditional games is the lack of education from the community to children about traditional games, as happened at SD Negeri 1 Pamijahan. they were never taught how to play traditional games by their families. This study aims to analyze traditional games at Elementary school Negeri 1 Pamijahan. The research method used was descriptive qualitative method, the subjects in this study were school principals, elementary school teachers, grade 4 students, and one of the parents of grade 4 students. The research results obtained were quite good, because the development of traditional games in elementary schools Negeri 1 Pamijahan already more than 50% of 12 classes know about traditional games. However, the implementation of traditional games in learning at Elementary School Negeri 1 Pamijahan is still lacking. Because only 2 out of 12 teachers implement traditional games in learning at the elementary school.
