

ABSTRACT

Women at this time have a very important role, both in the family, work environment or other social environment. Unlike the case in ancient times, female figures were often seen as inferior and weaker than men. However, along with the times and technology, women have been able to develop independently. Today's women are able to innovate, one of which is in agriculture. Women can now form farmer groups and use their yards to grow vegetables or other crops that can meet their family's food needs and increase their income. This study aims to determine ¹activities of the Women Farmer Group Srikandi Nagarawangi in the use of yards for vegetable crops,²to find out the factors that influence the activities of the Women Farmer Group Srikandi Nagarawangi in the utilization of the yard for vegetable crops. This research took place in Nagarawangi Vilage, Cihideung District, Tasikmalaya City. This study uses a quantitative descriptive method using a questionnaire in the form of a questionnaire with 23 samples from Women Farmer Group Srikandi Nagarawangi which were then processed using simple quantitative analysis. The result of the study, found that the activities carried out by Women Farmer Group Srikandi Nagarawangi included land preparation, seeding, planting, irrigation mechanisms, eradicating pests and diseases in plants, harvesting and post-harvest processing. Likewise with the factors that influence the activities of Women Farmer Group Srikandi Nagarawangi, among others, availability of land/place, availability of time, as well as knowledge and understanding of using the yard for growing vegetables.

Keywords: Activity, Women Farmer Group, Yard, Vegetable Crops.
