*The social problem that is currently being faced by the people of Handapherang Village is the habit of the people who still don't care enough about carrying out waste management so that the environment in Handapherang Village becomes polluted. The purpose of this study is to describe the role of youth youth organizations in waste management in Handapherang Village, Cijeungjing District, Ciamis Regency. This study uses a descriptive qualitative research method. The data collected is through observation, interviews and documentation. Data analysis was carried out by starting with data reduction, then presenting the data and then drawing conclusions. The results obtained from this study are that the youth of Karang Taruna Bina Adolescents in Handapherang Village play an active role in carrying out waste management at the Guha Caang Garbage Bank, by producing a community that is active in carrying out waste management independently starting from their own homes and the environment in Handapherang Village which is clean from waste, seen from the TPA Handapherang Village which is now used as a tourist attraction for the Leuwi Keris Dam by the village government. The conclusion from this study is that the youth of Karang Taruna Bina Adolescents in Handapherang Village carry out their role by providing all the knowledge and facilities that can support the waste bank program, so that the people of Handapherang Village are more concerned about environmental cleanliness and are independent in carrying out waste management independently.*
