It is submitted for getting *Sarjana Pendidikan* degree at English Education Department of the Faculty of Educational Sciences and Teachers' Training, Siliwangi University. The background information provides a context related to the role of technology as a medium for learning, which is animation video. The literature review provides a brief discussion of technology in education, animation video as a learning medium, and students' perceptions. The research design used in this study is a case study. Furthermore, the data was collected through semi-structured interviews, which are analysed by thematic analysis.
