

ABSTRACT

Social movement is a movement that encourages social change in society, the social movement carried out by the Syarikat Islam Tasikmalaya organization in organizing political education in Tasikmalaya City has the aim of making people aware so that they can participate in building the country with their roles, both in the government bureaucracy channel. This research also has restrictions through the period of 2020-2023 based on the leadership of the head of the organization.

The theory that the author presents will certainly support the research to be carried out, the theory used by the author includes the theory of social movements and the concept of political education which will be a guide in analyzing the object of research. The research method that the author will use in this research is a qualitative research method with a case study approach. Sampling using purposive sampling and snowball sampling techniques. In collecting data using interviews and documentation methods and analyzing data through three processes, namely data reduction, data presentation, and conclusion drawing. The method used in validity to test the validity of data is the source triangulation method.

The social movement that exists in the Syarikat Islam Tasikmalaya is a political education movement that has the aim of building awareness of the life of the nation and state in the community. The political education that is carried out is also based on the Al-Quran and Hadith in accordance with the principle of the Islamic Society organization, namely Dienul Islam and the mechanism is also quite organized starting from regular meetings and learning concepts that are like education in general. The participants also have diverse backgrounds ranging from students, students, general, to the working class, but most of them are members of the Syarikat Islam Tasikmalaya.

The impact of political education for participants is that they realize the meaning of life as a citizen and are also aware of their duties in various lines of life so that later they can participate in building the country with their roles so that in its implementation in the field they can have a positive impact on their environment, be it in the family, community, or country. In addition, participants also participate in formal government bureaucracies such as political parties.
