

ABSTRACT

TAUFIK RIZKI 2023. *The Effect of Acuspike Aids on Smash Results in Volleyball Games*. Departement of Physical Education, Faculty of Teacher Training and Education, Siliwangi University, Tasikmalaya.

Volleyball is a team sport in which there are 6 players in one team. Volleyball is a game that is not easy for everyone to play. Playing volleyball requires good movement coordination effectively and efficiently. The aim of this research is to obtain information regarding the effect of using the acuspike aid on the Smash results of volleyball games among volleyball extracurricular students at SMAN 9 Garut for the 2022/2023 academic year. The research method used is the experimental method. Based on the results of data processing using statistical tests, it turns out that empirically the application of the acuspike tool has a significant effect on the results of the Smash skills of volleyball extracurricular students at SMAN 9 Garut for the 2022/2023 academic year.

Keywords: *Acuspike, Smash , Volleyball*
