

ABSTRACT

Mely Yulianti. 2024. THE INFLUENCE OF TOXIC PARENTING ON ADOLESCENT INSECURITY IN SMA NEGERI 3 TASIKMALAYA CITY. Department of Community Education. Faculty of Teacher Training and Education. Siliwangi University. Tasikmalaya.

Students who feel that their parents always impose their will and are always overprotective of these students so that children always feel less confident. The aim of this research is to determine the influence of toxic parenting on adolescent insecurity at SMA Negeri 3 Tasikmalaya City. The research method used in this research is quantitative data analysis with a correlational approach to look for the influence between 2 variables. The population in this study was 105 people with a sample of 30 people using a simple random sampling technique. The instrument used was a questionnaire given via Google Form. The hypothesis test used is simple linear regression analysis and R-Square with a correlation value of 0.785, which means the correlation value of X with Y is included in the strong categorization. With an R Square value of 0.676, which means that X contributes to Y by 67.6%, the rest is influenced by other factors. Meanwhile, the significance value is 0.302, which means that there is a significant influence between variable.

Keywords: Toxic Parenting, Insecurity, Teenagers.
