This research aims to determine the influence of industrial agglomeration, labor and industrial sector investment on the GRDP of districts/cities in West Java Province in 2013-2022. The research method used in this research is a quantitative method with a descriptive approach and taking secondary data obtained from the West Java Central Bureau of Statistics (BPS) website and the West Java Open Data website. The model used in this research is a panel data. The research results show that partially, labor and investment in the industrial sector have a significant positive effect, while agglomeration has an insignificant positive effect. Simultaneously, industrial agglomeration, labor and investment in the industrial sector have a significant effect on the GRDP of districts/cities in West Java Province in 2013-2022.

Keywords :GRDP, Industrial Agglomeration, Labor, Industrial Sector Investment
