

ABSTRACT

ANNISA ASADIFADILLAH YOSHIANA. 2024. IMPACT OF CIAMIS POSYANDU INFORMATION SYSTEM TRAINING (SIPOCIS) IN IMPROVING DIGITALIZATION CAPABILITY (Study of Kenanga Posyandu Cadres, Mekarjaya Village, Baregbeg District, Ciamis Regency) Department of Community Education, Faculty of Teacher Training and Education, Siliwangi University Tasikmalaya.

The impact of the web-based Ciamis Posyandu Information System (SIPOCIS) training is that most Posyandu cadres still use a manual system in their activities and this results in slowing down of work so that there is a risk that posyandu data will be lost or redundancy occurs and the results will be less accurate. The aim of this research is to determine the impact of Ciamis Posyandu Information System (SIPOCIS) training in improving digitalization capabilities at Posyandu Kenanga, Mekarjaya Village, Baregbeg District, Ciamis Regency. This research uses descriptive qualitative research methods. Data input was carried out using three methods, namely observation, interviews and documentation. The data analysis techniques used are data reduction, data presentation and drawing conclusions. The results of this research show that there are (a) changes in posyandu data input from manual to digital, (b) mentoring and training strategies, (c) web-based Ciamis posyandu information system (SIPOCIS), (d) competence of Posyandu cadres, (e) cognitive , affective and psychomotor, (f) technical assistance and guidance, and (g) benefits for the institution. In conclusion, the Ciamis Posyandu Information System (SIPOCIS) training has been successful in increasing the knowledge and digitalization skills of Posyandu cadres.
