

ABSTRACT

Siti Sulastri. 2023. "The Influence of Family Environment and Self Control on Academic Procrastination in Completion of Thesis for Economic Education Students at Siliwangi University (Research Survey on Economics Education Students Class of 2018)". Department of Economic Education, Faculty of Teacher Training and Education, Siliwangi University. Tasikmalaya. Under the guidance of Ati Sadiah, M.Pd and Astri Srigustini, M.Pd

The research problem is based on the high level of academic procrastination carried out by students. One of the examples of this academic procrastination is carried out in final year students completing their thesis assignments. The aim of the research is to determine the influence of the family environment and self-control in completing the thesis of economic education students at Siliwangi University. The method used in the research is a survey method with a population of 112 students. The sampling technique uses purposive sampling technique, namely a sampling technique with certain criteria, the criteria used by economics education students class of 2018 who are working on their thesis. The data collection technique in this research uses a questionnaire and the data analysis technique used is multiple linear regression analysis. The research results show that family environment variables and self-control have a negative or inverse relationship with academic procrastination. This means that if the level of family environment increases, the level of academic procrastination decreases, conversely, if the level of family environment decreases, the level of academic procrastination increases, likewise with the self-control variable, when the level of self-control increases, the level of academic procrastination decreases and when the level of self-control decreases, the level of academic procrastination will increase. So, it can be concluded that the family environment and self-control have a significant influence on academic procrastination in completing theses for economic education students at Siliwangi University Class of 2018.

Keywords: Family Environment, Self Control, Procrastination
