

ABSTRAK

MINA MAHAROT FAIQOH 2024. HUBUNGAN KECERDASAN INTRAPERSONAL DENGAN HASIL BELAJAR BIOLOGI PESERTA DIDIK (Studi Korelasional di Kelas XI MIPA SMAN 4 Tasikmalaya Tahun Ajaran 2023/2024). Jurusan Pendidikan Biologi. Fakultas Keguruan dan Ilmu Pendidikan Universitas Siliwangi.

Penelitian ini bertujuan untuk mengetahui hubungan antara kecerdasan Intrapersonal dengan hasil belajar biologi peserta didik. Metode Penelitian yang digunakan adalah korelasi. Populasi dalam penelitian ini adalah seluruh kelas XI MIPA SMA Negeri 4 Tasikmalaya tahun ajaran 2023/2024. Sampel diambil secara *purposive sampling* yaitu kelas XI MIPA 5 sebanyak 38 peserta didik sebagai kelas penelitian dan XI MIPA 3 sebanyak 36 peserta didik sebagai kelas uji coba instrument. Pengumpulan data dilakukan dengan dokumentasi hasil skor penilaian akhir semester (PAS) untuk memperoleh data hasil belajar dan memberikan angket kecerdasan intrapersonal. Hasil penelitian yang diperoleh menunjukkan ada hubungan antara kecerdasan intrapersonal dengan hasil belajar dengan koefisien korelasi (R) sebesar 0,980 artinya memiliki Tingkat hubungan yang sangat kuat. Koefisien determinasi variabel kecerdasan intrapersonal terhadap hasil belajar diperoleh R² yaitu 0,960 artinya variabel kecerdasan intrapersonal memberikan kontribusi sebesar 96% terhadap hasil belajar peserta didik. Kesimpulan penelitian yaitu ada hubungan antara kecerdasan intrapersonal dengan hasil belajar biologi peserta didik di kelas XI MIPA SMA Negeri 4 Tasikmalaya

Kata Kunci : Biologi, Hasil Belajar, Kecerdasan Intrapersonal

ABSTRACT

MINA MAHAROT FAIQOH 2024. *THE RELATIONSHIP OF INTRAPERSONAL INTELLIGENCE WITH STUDENTS' BIOLOGY LEARNING OUTCOMES (CORRELATIONAL STUDY IN CLASS XI MIPA SMAN 4 TASIKMALAYA ACADEMIC YEAR 2023/2024).*

Department of Biology Education, Faculty of Teacher Training and Education, Siliwangi University.

This research aims to determine the relationship between intrapersonal intelligence and students' biology learning outcomes. The research method used is correlation. The population in this study was all class XI MIPA SMA Negeri 4 Tasikmalaya for the 2023/2024 academic year. The samples were taken by purposive sampling, namely class XI MIPA 5 with 38 students as the research class and XI MIPA 3 with 36 students as the instrument testing class. Data collection was carried out by documenting the results of the end of semester assessment scores (PAS) to obtain learning outcome data and provide an intrapersonal intelligence questionnaire. The research results obtained show that there is a relationship between intrapersonal intelligence and learning outcomes with a correlation coefficient (R) of 0.980, meaning it has a very strong level of relationship. The coefficient of determination of the intrapersonal intelligence variable on learning outcomes was obtained by R², namely 0.960, meaning that the intrapersonal intelligence variable contributed 96% to students' learning outcomes. The conclusion of the research is that there is a relationship between intrapersonal intelligence and the biology learning outcomes of students in class XI MIPA SMA Negeri 4 Tasikmalaya
