ABSTRACT

SITI BARKAH

**FACTORS ASSOCIATED WITH THE IMPLEMENTATION OF
SANITARY HYGIENE IN THE FOOD MANAGEMENT SITE OF THE
SOYBEAN TOFU INDUSTRY IN THE KUNINGAN SUB-DISTRICT OF
KUNINGAN DISTRICT**

Hygiene is all conditions and measures necessary to ensure the safety and feasibility of food at all stages of the food chain. Meanwhile, food sanitation is an effort to prevent the possibility of increasing and breeding rotting microorganisms and pathogens in food, equipment and buildings. Based on Permenkes RI No. 14 of 2021, sanitary hygiene efforts must be implemented in Food Management Places (TPP). Certain TPPs are TPPs whose products have a shelf life of one to less than seven days at room temperature, and the Soy Tofu Industry is included in Certain TPPs. In Kuningan Regency, the percentage of TPPs that qualify according to the standard in the Specific TPP category is 69.93%. The largest number of Soy Tofu Industries in Kuningan District is 33 Tofu Industries. This study aims to analyze the factors associated with the application of sanitary hygiene in the TPP of the soybean tofu industry in Kuningan District, Kuningan Regency. This research design is cross sectional. The sample in this study were 33 owners/managers/responsible for the soybean tofu industry TPP. The sampling technique used was saturated sampling. Data were collected using primary data with questionnaire instruments and observation sheets. The research data were analyzed univariately and bivariately. The results of the analysis obtained factors associated with the application of sanitary hygiene, namely knowledge (p value = 0.003, OR = 13.750), attitude (p value = 0.006, OR = 13), availability of sanitary hygiene facilities (p value = 0.013, OR = 9.6) and training history (p value = 0.004, OR = 13.333). In an effort to increase knowledge, the owner/manager/responsible person in the soybean tofu industry TPP should always be active in seeking information related to sanitary hygiene in the tofu industry TPP. One of them is by participating in training related to sanitary hygiene conducted by the Health Office.
