*The increase in consumer consumption of coffee drinks in Indonesia continues to occur. Coffee can not only be consumed by a few groups, but can be consumed by all generations and genders. One of them, the group that consumes a lot of coffee is teenagers (17-24 years). This is based on the results of initial research at the Joglo Cafe in Tasikmalaya City, where the majority of visitors were teenagers, both men and women. The objectives of this research are: to examine the attributes most considered in coffee decisions at Joglo Cafe, to examine teenage consumer preferences based on consumer attitudes towards coffee attributes at Joglo Cafe. The research method uses descriptive analysis with a survey approach. The results obtained are: the results of teenage consumers' preferences for the attributes of coffee drinks at the Joglo Cafe in Tasikmalaya City which are considered, namely blend type coffee, medium coffee taste, medium black coffee color, and coffee prices ranging from IDR 19,000 - IDR 22,000. teenagers' preferences based on attitudes towards the attributes of coffee drinks, namely the attributes of taste of coffee, aroma of coffee, and price of coffee are the three attributes most often considered by coffee consumers at the Joglo Cafe, Tasikmalaya City.*
