

ABSTRACT

*Auladdiny, Khosyi. (2024). **The Influence of Powerpoint-Based Learning Media on the Emotional Intelligence of Santri (Case Study at the Nashrul Haq Al Islamy Islamic Boarding School, Tasikmalaya City).** Department of Community Education, Faculty of Teacher Training and Education, Siliwangi University, Tasikmalaya.*

Learning media can be used as an alternative to support student learning activities in the form of interesting games for learning and increasing student intelligence. At the educational level, not only intellectual intelligence is emphasized, but students' emotional intelligence also needs to be considered. The aim of this research is to find out whether or not there is an influence of PowerPoint-based learning media on students' emotional intelligence. The research method used in this research is a descriptive quantitative research method, by looking for the influence of variables. The data collection techniques used were observation, questionnaires and documentation. The results of the research are that the largest scale category is PowerPoint-based learning media at 16 or 67% in the medium scale category and emotional intelligence at 16 or 67% in the medium scale category. Based on the results of the R-square determination analysis, a value of 0.205 was obtained, which means that PowerPoint-based learning media (X) influenced students' emotional intelligence (Y) by 20.5%, while the remaining 79.5% was influenced by other factors. So it can be concluded that H_a is accepted and H_o is rejected, PowerPoint-based learning media has an effect on students' emotional intelligence. Then the level of correlation between variables X and Y is 0.452, which means the level of correlation is moderate.

Keywords: Powerpoint Learning Media, Emotional Intelligence
