

PREFACE

First of all, thanks to Allah SWT, the almighty, for the abundance of grace and the guidance given to the writer that made this paper possible. This proposal is entitled "**Indonesian Students' Academic Behaviour During the Transition of the Learning Environment from Online to Blended Learning Post COVID-19 Pandemic**". The purpose of writing this proposal is to fulfil the requirements for the *Sarjana Pendidikan* Degree Seminar.

This research is centred around the "students' academic behaviour" of undergraduate students towards blended learning environments after they participate in online learning during the COVID-19 pandemic. The author provides the introduction of the research in Chapter 1, the theoretical foundation of students' academic behaviour, including the definition, causes, and types, and the research proposal in Chapter 2. In Chapter 3, the author provides the research methodology to explain how this research would be carried out. In Chapter 4, the author presents the research findings; in Chapter 5, the author makes a conclusion and a suggestion.

The writer realises that this paper is still not perfect from an overall perspective. He hopes that suggestions and constructive criticism from readers will help the writer compile a better research paper in the future. Finally, hopefully, this paper can be useful for readers to gain more insight and knowledge about the importance of academic behaviour in the realm of education.
