

PREFACE

This research was conducted because researchers believe that using Canvas as a one of the LMS has many benefits. By using the TAM framework to analyse how Canvas works and how it is perceived by the students who use it. The researcher found out that the students feel that Canvas can be useful and help them in developing their learning, they also feel more productive when using it. Hopefully, this research can help students and teachers about the perspective of students who use LMS to carry out learning activities and the benefits of using Canvas which can be used as an LMS for teaching.
