

PREFACE

All praises to Allah SWT. Due to all His blessings and His kindnesses, the researcher has been given opportunities to reach this point. *Sholawat* may continuously delivered towards Rasulullah SAW. With all His attentions and His guidance to His people, the researcher could remain in the right way. Thereafter, the researcher would like to express gratitude and love to the researcher's parents that always there to support him in almost every condition. Also, thankfulness would like to be delivered to my first and second supervisors who always patiently guided the researcher and dedicated their times. Last but not least, thanks to all the researcher's friends who have accompanied researcher's college life.

This proposal is intended to discover the students' perception towards Quizizz's leaderboard utilization in formative assessment. This is derived from the researcher's personal experience where he feels the leaderboard affected his performance while accomplishing formative assessment given. The researcher expects the results would strengthen the existing studies regarding Quizizz and precisely the leaderboard.

In the process of accomplishing this study, the researcher faced numerous of challenges, whilst internal factors became the prominent aspect. Moreover, discovering the right pattern to arrange the study's components is also prominent issue. By the challenges are solved by the researcher, this study is expected to accomplish its aims.
