*The existence of Chicken Slaughterhouse adjacent to human settlements requires society to adapt the impact caused by the existence of Chicken Slaughterhouse. This research was conducted based on the research background. The purpose of this study is to determine the level of society adaptation to the existence of Tamansari Chicken slaughterhouse Trading Company in Linggajaya Urban Village, Tasikmalaya City. The method that used in this study is survey method with the location selected purposely (purposive) that is located in RT. 04 RW. 13 Linggajaya, Mangkubumi, Tasikmalaya City, West Java. The number of people (population) in the area are 209 inhabitants. Aware with the large population, then this study conducted a sampling that can represent the population by using the slovin formula and based on the human settlements adjacent to the Chicken Slaughterhouse that are 37 people. The results obtained based on this study shows that the level of society adaptation to the existence of the slaughterhouse that is in the moderate category with a number of 1550. This indicates that the Chicken Slaughterhouse is acceptable to the society but for the handling of liquid waste must be further enhanced by the Chicken Slaughterhouse manager.*
