Kelompok tani sebagai salah satu komponen utama pembangunan pertanian harus terus ditingkatkan, yakni dengan peningkatan peran kelompok dan partisipasi petani dalam setiap kegiatan agar menjadi organisasi petani yang kuat dan mandiri. Penelitian ini bertujuan untuk mengetahui peran kelompok tani, partisipasi petani dan hubungan antara peran kelompok tani dengan partisipasi petani. Penelitian di Desa Linggajati Kecamatan Sukaratu Kabupaten Tasikmalaya pada kelompok tani Kubang Koak diperoleh sampel sebanyak 42 petani menggunakan *simple random sampling*. Data peran kelompok tani dan partisipasi petani dianalisis secara deskriptif kuantitatif. Hubungan peran kelompok tani dengan partisipasi petani dianalisis menggunakan uji korelasi *Rank Spearman*. Hasil penelitian peran kelompok tani terhadap seluruh kegiatan kelompok termasuk dalam kategori tinggi. Adapun peran kelompok tani sebagai wahana kerja sama termasuk dalam kategori tinggi, sebagai kelas belajar dan unit produksi termasuk dalam kategori sedang. Sedangkan hasil partisipasi petani terhadap seluruh kegiatan kelompok termasuk dalam kategori sedang. Adapun partisipasi petani dalam tahap pelaksanaan termasuk dalam kategori tinggi, dalam tahap perencanaan dan pengawasan termasuk dalam kategori sedang. Hasil analisis hubungan menunjukkan terdapat hubungan positif antara peran kelompok tani dengan partisipasi petani dengan koefisien korelasi sebesar 0,262 dan kekuatan hubungan yang termasuk dalam kategori rendah.

Kata Kunci: kelompok tani, peran, partisipasi

ABSTRACT
THE ROLE OF FARMERS GROUPS TOWARDS INCREASING
PARTICIPATION OF ROBUSTA COFFEE FARMERS IN LINGGAJATI
VILLAGE, SUKARATU DISTRICT, TASIKMALAYA REGENCY

Farmer groups as one of the main components of agricultural development must continue to be improved, namely by increasing the role of groups and farmer participation in every activity in order to become a strong and independent farmer organization. This study aims to determine the level of the role of the farmer groups, farmer participation and the relationship between the role of the farmer groups and farmer's participation. Research in Linggajati Village, Sukaratu District, Tasikmalaya Regency, namely the Kubang Koak farmer group by taking a sample of 42 farmers with a simple random sampling. The data on the role of farmer groups and farmer participation were analyzed quantitatively descriptively. The relationship between the role of the farmer group and farmer participation was analyzed applying the Spearman Rank correlation test. The results of the research on the role of farmer groups in all group activities was in the high category. The role of farmer groups as a vehicle for cooperation was in the high category, as learning classes and production units were in the medium category. The results of farmer participation in all group activities was in the medium category. Farmer participation in the implementation stage was in the high category, in the planning and monitoring stages were in the medium category. The relationship analysis showed that there was a positive relationship between the role of farmer groups and farmer participation with a correlation coefficient of 0.262 which means the strength of the relationship was a low category.

Keywords: farmer group, role, participation
