**HUBUNGAN PENGETAHUAN, SIKAP DAN PERILAKU MASYARAKAT PADA USIA PRODUKTIF DALAM PENCEGAHAN PENULARAN COVID-19 DI WILAYAH KELURAHAN MANGKUBUMI KOTA TASIKMALAYA TAHUN 2022**

Pada tahun 2021-2022 Kelurahan Mangkubumi menempati urutan tertinggi ke-1 yang mencatat kasus Covid-19 di Kecamatan Mangkubumi Kota Tasikmalaya. Tujuan penelitian adalah mengetahui hubungan pengetahuan, sikap dan perilaku masyarakat pada usia produktif dalam pencegahan penularan Covid-19 di Wilayah Kelurahan Mangkubumi. Penelitian ini merupakan penelitian kuantitatif menggunakan pendekatan *cross sectional*. Populasi kasus pada penelitian ini adalah masyarakat pada usia produktif di Wilayah Kelurahan Mangkubumi tahun 2022 sebanyak 100 orang. Teknik pengambilan sampel untuk kelompok kasus menggunakan *purposive sampling* sehingga besar sampel sebanyak 100 orang. Pengumpulan data untuk variabel pengetahuan, sikap dan perilaku pencegahan penularan Covid-19 dilakukan melalui wawancara menggunakan instrumen kuesioner. Analisis data terdiri dari analisis univariat dan bivariat menggunakan korelasi rank spearman. Hasil penelitian menunjukkan ada hubungan antara variabel pengetahuan dengan perilaku pencegahan penularan Covid-19 ( $p=0,000 < 0,005$ ). Sementara itu, variabel pengetahuan dengan sikap ( $p$  value 0,227) dan sikap dengan perilaku pencegahan penularan Covid-19 ( $p$  value 0,852) tidak berhubungan. Saran kepada masyarakat di Wilayah Kelurahan Mangkubumi untuk dapat menjadi suatu peringatan bahwa ternyata jika pengetahuan saja tanpa perilaku akan sangat mempengaruhi dalam pencegahan penularan Covid-19, agar masyarakat dapat mengerti bahwa pentingnya mencegah penularan Covid-19 dan bisa kembali pulih serta bebas dari Covid-19.

Kata kunci: Pengetahuan, Sikap dan Perilaku Pencegahan Penularan Covid-19

**COMMUNITY KNOWLEDGE, ATTITUDE AND BEHAVIOR  
RELATIONSHIP AT THE PRODUCTIVE AGE IN PREVENTING COVID-19  
TRANSMISSION IN THE MANGKUBUMI VILLAGE AREA,  
TASIKMALAYA CITY IN 2022**

In 2021-2022 the Mangkubumi Sub-District ranks 1st highest in recording cases of Covid-19 in Mangkubumi District, Tasikmalaya City. The aim of the study was to determine the relationship between knowledge, attitudes and behavior of people of productive age in preventing the transmission of Covid-19 in the Mangkubumi Village area. This research is a quantitative study using a cross sectional approach. The population of cases in this study are people of productive age in the Mangkubumi Village Area in 2022 as many as 100 people. The sampling technique for the case group used purposive sampling so that the sample size was 100 people. Data collection for the variables of knowledge, attitudes and behavior to prevent the transmission of Covid-19 was carried out through interviews using a questionnaire instrument. Data analysis consisted of univariate and bivariate analysis using Spearman's rank correlation. The results showed that there was a relationship between the knowledge variable and the behavior to prevent the transmission of Covid-19 ( $p=0.000<0.005$ ). Meanwhile, the variable knowledge with attitude ( $p$  value 0.227) and attitude with the behavior of preventing the transmission of Covid-19 ( $p$  value 0.852) are not related. Suggestions to the community in the Mangkubumi Sub-district Area to be a warning that in fact knowledge alone without behavior will greatly affect the prevention of Covid-19 transmission, so that people can understand the importance of preventing Covid-19 transmission and being able to recover and be free from Covid-19 .
