This research aims to determine the effect of general allocation fund, domestic investment, foreign investment, and Covid-19 on the gross regional domestic product in West Java in 2007-2022. This current study analysis (a) how the variables of general allocation fund, domestic investment, foreign investment, and Covid-19 partially affect gross regional domestic product of West Java in 2007-2022 and (b) how the general allocation fund, domestic investment, foreign investment, and Covid-19 together affect the gross regional domestic product in West Java in 2007-2022. The method used is multiple linear regression analysis using Eviews 10 software. The result of this study indicates partially general allocation funds, domestic investment, and foreign investment have a positive relationship and significant effect. Meanwhile Covid-19 has no significant effect on gross regional domestic product in West Java in 2007-2022. Taken together, general allocation funds, domestic investment, foreign investment, and Covid-19 have had a significant effect on gross regional domestic product in West Java in 2007-2022.

Keywords: Gross Regional Domestic Product, General Allocation Fund, Domestic Investment, Foreign Investment, and Covid-19.
