

ABSTRAK

FARID NURUL FALAH. 2025 **Hubungan Sarana prasarana belajar penjas dengan motivasi belajar penjas pada siswa MTS PSA AL – Mubarakah Cineam**. Jurusan Pendidikan Jasmani. Fakultas Keguruan dan Ilmu Pendidikan. Universitas Siliwangi.

Permasalahan penelitian ini yaitu kurangnya sarana prasarana yang tersedia di MTS PSA AL-Mubarakah. Tujuan penelitian ini adalah untuk mengetahui apakah terdapat Hubungan antara sarana prasarana belajar penjas dengan motivasi belajar penjas pada siswa MTS PSA AL – Mubarakah Cineam. Metode penelitian yang digunakan adalah metode kuantitatif deskriptif. Desain penelitian ini menggunakan kuesioner. Populasi penelitian ini adalah seluruh siswa dan siswi kelas 8 dan 9 yang berjumlah 96 orang. Pengambilan sampel menggunakan teknik *purposive sampling* dengan jumlah sampel 34 orang. Teknik analisis data menggunakan Uji Chi Kuadrat. Berdasarkan hasil pengolahan data dan di uji statistika diperoleh nilai $t_{hitung} = 2,08$ sedangkan $t_{tabel} = 2,037$ dengan demikian t_{hitung} lebih besar dari t_{tabel} dan berada diluar daerah penerimaan hipotesis nol, artinya H_1 diterima atau H_0 ditolak. Dengan demikian, sarana prasarana belajar penjas dengan motivasi belajar penjas terdapat hubungan yang signifikan pada siswa MTS PSA AL-Mubarakah Cineam dan hipotesis penelitian yang diajukan diterima atau terbukti.

Kata kunci: Sarana prasarana, Motivasi

ABSTRACT

FARID NURUL FALAH. 2025 The Relationship between Physical Education Learning Facilities and Infrastructure and Motivation to Learn Physical Education in Students at MTS PSA AL-Mubarakah Cineam. Department of Physical Education, Faculty of Teacher Training and Education, Siliwangi University.

The problem of this research is the lack of infrastructure available at MTS PSA AL-Mubarakah. The purpose of this study is to determine whether there is a relationship between physical education learning infrastructure and physical education learning motivation in MTS PSA AL-Mubarakah Cineam students. The research method used is a descriptive quantitative method. The design of this study uses a questionnaire. The population of this study was all 8th and 9th grade students totaling 96 people. Sampling used a purposive sampling technique with a sample size of 34 people. The data analysis technique used the Chi-square Test. Based on the results of data processing and statistical tests, the t -hitung value = 2.08 was obtained while the t -tabel = 2.037 thus the t -count is greater than the t -table and is outside the null hypothesis acceptance area, meaning H_1 is accepted or H_0 is rejected. Thus, physical education learning infrastructure and physical education learning motivation have a significant relationship in MTS PSA AL-Mubarakah Cineam students and the proposed research hypothesis is accepted or proven.
