

## **PREFACE**

This research, entitled “Exploring the Negative Impact of Artificial Intelligence on Indonesian Higher Education” is submitted to fulfill the requirements for writing a thesis in the English Education Study Program, Faculty of Teacher Training and Education, Siliwangi University.

This research includes the background of why this research was conducted, a literature review, and research procedures. The first chapter presents background on the negative impact of artificial intelligence on higher education students, problem formulation, research relevance, and research objectives. The second chapter explains the research title, namely exploring the negative impact of artificial intelligence on Indonesian higher education. The third chapter describes the research design, setting, and participants, as well as data collection and analysis. The research design used is a descriptive case study. Data were collected through semi-structured interviews based on references from Nuzhat and Fozia (2022). The data analyzed using thematic analysis by Braun and Clarke (2012).

This research could not have been completed without the guidance of several people close to the author. Therefore, the author would like to express her deepest gratitude to them in the acknowledgments section. Finally, the author welcomes suggestions and constructive criticism from readers to improve this paper. Hopefully, this research will be useful for the author and readers.
