

## **PREFACE**

Thanks to Allah swt., for His blessings and grace, the author has been able to complete the writing of a thesis entitled “Social Media as a Tool to Assist Students’ English Language Learning Process at Indonesian Higher Level” which is submitted to fulfill the requirements for obtaining a Bachelor of Education degree in the English Education Study Program, Faculty of Teacher Training and Education, Universitas Pendidikan Indonesia, Siliwangi University.

The motivation for writing this thesis comes from the observation that social media platforms are increasingly becoming part of students’ daily lives. These platforms not only serve as channels for social interaction but also as tools that can help in learning English. The aim is to investigate how social media can aid the English learning process of its users, identify effective practices, and overcome challenges that may arise.

The implications of this research contribute to English learning using Social Media as a tool to assist students at Indonesian higher level. It was impossible for me to complete this thesis without the involvement of several research colleagues. I would like to thank all of them for their support in preparing this research. Hopefully this thesis is helpful to researchers, readers and the educational world.
